

Internal Memo

Data Center Upgrade Initiative

Date: July 10, 2025

An internal executive memo issued by CTO Arjun Verma announced a major infrastructure upgrade initiative.

The company approved a ₹12 Crore investment to modernize its cloud computing infrastructure. The upgrade focuses on improving server scalability, reducing latency for international users, and enhancing disaster recovery systems.

The project is being led directly by Arjun Verma, with support from the DevOps and Infrastructure teams. The expected completion date is November 2025.

The upgrade includes migration to a hybrid cloud architecture, improved load balancing systems, and enhanced security encryption protocols.
