

Company Profile

Nexora Technologies is a fictional global technology company founded in 2019 in Hyderabad, India. It operates in the domains of Artificial Intelligence, Cloud Computing, and Enterprise Automation. The company was established with the goal of reducing manual operational workload in businesses by integrating AI-driven systems into everyday workflows such as customer support, analytics, cybersecurity, and decision-making.

The company is headquartered in Hyderabad, Telangana, India, in a facility located in the HITEC City technology corridor. Over time, Nexora has expanded its operations to multiple regions including Bengaluru, Pune, and Singapore. As of 2025, the organization employs approximately 850 full-time employees across engineering, product, sales, research, and support divisions.

The leadership team is composed of industry professionals from major global tech firms. Priya Sharma serves as the Founder and Chief Executive Officer (CEO), responsible for strategic vision and global expansion. Arjun Verma is the Chief Technology Officer (CTO), overseeing AI research, infrastructure design, and product engineering. The company also has Meera Iyer as Chief Financial Officer (CFO), managing financial operations, investments, and budgeting.

Nexora's annual revenue for the financial year 2025 is estimated at ₹320 Crore, with strong investment in R&D and international expansion. The company operates under a mission to "build intelligent systems that simplify business operations and enhance human productivity."

Core values include:

- Continuous innovation in AI systems
- Transparency in internal operations
- Customer-centric product design
- Ethical use of artificial intelligence
- Commitment to employee learning and growth

Nexora primarily serves mid-sized and large enterprises in retail, banking, logistics, and healthcare sectors. Its solutions are deployed in over 12 countries, with India, Singapore, and Germany being the strongest markets.
